

	<p>Do not hesitate to contact System80 with any questions or concerns about your 880. The 880 began as a passion project with the aim of making a small recreation of the TR-808 in Eurorack with as</p>	<p>few compromises as possible. It was a lot of fun to design, prototype, and test. We hope that it will inspire you for many years.</p>
Warranty	<p>Your 880 is guaranteed to be free from manufacturing defects for 1 YEAR from the date of purchase. We will replace or repair your unit if we find it to be defective.</p> <p>NOTE: the 880's panel is screenprinted in 3 colours of durable epoxy-based ink. It is a 5 step process that is</p>	<p>performed manually. Being a hand crafted product, you may notice very small blemishes or defects upon close inspection. These are unavoidable and inherent to the manual screenprinting process.</p>
Contact	<p>Please contact us by email: info@system80.net</p> <p>While System80 has a regular presence on social media sites such as Facebook, Instagram, Twitter,</p>	<p>YouTube, and Muffwiggler, these are <i>not</i> the best ways to reach us with questions or concerns about your 880.</p> <p>We endeavor to respond to email inquiries within 24 hours of receiving them.</p>
Open Source	<p>The 880 is open source hardware and the firmware is open source software. This means the complete design is available for non-commercial use. If your 880 ever requires an out-of-warranty repair, the design files</p>	<p>should allow a local qualified technician to perform any repair or modification.</p> <p>www.github.com/minisystem/880</p>
